

# Medication costs are on the rise.

Here's what we're doing about it.

It's no secret that prescription prices keep going up. As your pharmacy benefit manager, we're working closely with The State Employee Health Plan to help make sure you get the medication you need. **We'd like to tell you about one way we're helping to keep your medication costs in check.**

## Automatic rebates help save you money.

The State Employee Health Plan participates in a program that benefits from manufacturer rebates on many brand-name medications. When a rebate is available, we apply the savings to your deductible or coinsurance—so you pay less out of pocket for your prescription at pick-up. This is one of the many ways we work together to help control your costs.

## Our promise to you.

You can count on us to continuously monitor medication prices and negotiate regularly with manufacturers and with the pharmacies where you pick up your medication. We have your best health at heart.

## Check drug costs anytime

Visit **Caremark.com** or use our mobile app to manage your medications and review coverage quickly and easily.

**Remember, this program automatically applies the rebates to your deductible or coinsurance, when available. There's nothing you need to do — just keep filling as you do today.**
